

mean by all these threats and whether or not ConAgra is going to stay or go. This is the one where I simply cannot in good faith vote for and I hope that all members of the body think hard about this one. I know it's late, but think hard about it before you vote on this one because it's just too much. It's gone a little bit too far for me.

PRESIDENT: Thank you. Senator Chambers, then Senator Hall.

SENATOR CHAMBERS: Mr. Chairman, members of the Legislature, I sure like what Senator Moore said but, Senator Moore, I'm afraid we are going to have cowering, crawling, cringing, clinking, clanking, clattering, collection of collisionist junk because the Legislature does not have the will. That is the reality of it. ConAgra should show some mercy on the Legislature. They have the power to do this, they have shown it, if they had an ounce of mercy or decency. They have vanquished their foe. They should allow their foe a shred of self-respect. Even when I am taking out after somebody and I have them in a corner, if they want to come out, I leave them a way to come out of the corner. You should never take away the last iota of dignity that an opponent has. And that is what ConAgra is doing to this Legislature, not to me. Nobody can take anything from me. And people see me as an outsider where this Legislature is concerned. When it rolls over and kicks its legs up and whines, people don't include me in that group and I have letters to prove it. But for the sake of the rest of the Legislature, you all are ConAgra's kind, I am not. If ConAgra were merely doing it to me, I could understand it, but they can't do it to me. They are unable to do it to me so they take it out on you all. They are going to take away that last measure of dignity that you could have as you crawl back to your districts and explain why you capitulated. They are not going to let you take this off that bill. If they wanted to make a public relations show, if they wanted to indicate that they are not totally unreasonable, then they would have told those who are managing this bill, let the children have a lollipop, we have already made them suckers. But ConAgra is not going to do that. And maybe what I need to do is learn a lesson from ConAgra because I see the consideration that this Legislature gives somebody who knocks them down, steps on them, spits on them, then grinds the spit in with the sole of their shoe. That is what they are doing. They are converting the integrity of the Legislature into something which as a southern politician compared to a bucket of warm spit. This is the last opportunity on this bill that the Legislature has to say in...by virtue of a token
